Offshore Racing Boat from Båtbyggarna AB

Race Boat B28 - World Champion Boat from 1995

The B28 has proven very successful both in the race boat- and pleasure boat version. The B28 has won several championships in offshore racing.

The construction materials make the boat extremely light, stiff and strong. These features and the unique design, makes it possible to achieve the very good performances both in the rough and the flat water conditions these boats run in.

The designer, Ocke Mannerfelt, relies on the DIAB sandwich concept for all his boat designs.

Core material:

Divinycell® H-grade in different densities

Loa: 8.65 m
Width: 3.1 m
Weight: 1.3 - 1.6 tons
Speed: 93 knots

Face material: Multiaxial glass fibre / Vinylester

Manufacturing process: Wet lay-up with vacuum bagged core

Manufacturer: Båtbyggarna AB

Design: Ocke Mannerfelt Design
