Revolutionary DIAB Sandwich Water Ski

The revolutionary DIAB cored GOODE ski in action.

Michigan-based GOODE Ski Technologies have produced a revolutionary, sandwich composite slalom water ski that has taken the US competition circuit by storm.

At all levels of competition the patented GOODE ski has dominated regional and national events. GOODE skis won more medals at the US Nationals than all other water skis combined. In addition GOODE skis hold both the men's and women's world records.

In developing the new ski concept the GOODE design team decided to ignore what had gone before and started with 'a clean sheet of paper' in order to produce a competition water ski that is substantially lighter and has much better flex control and hydrodynamics than any other ski.
