MUNDAL båt as - Building FRP sandwich vessels in Norway

'Bluefin' - a fishing vessel Purse Seiner built by MUNDAL Båt AS.

Mundal Båt AS is one of Norway's leading builders of FRP sandwich vessels. The company was established in 1981 by brothers Atle and Nils Landro who recognized that the light weight/high strength and corrosion resistant attributes of composites were ideal for fishing vessels.

To date Mundal has built and delivered over 38 commercial vessels using Divinycell sandwich construction. In addition it has re-built/expanded a further 15 vessels, again using sandwich construction. It now offers vessels up to 33.5 meters (110 ft.) in length. The company uses a variety of composite manufacturing techniques and has recently introduced DIAB Core Infusion Technology™.

In addition to its commercial boat building work, Mundal has expanded its activities to include the production of a variety of sandwich composite components for offshore oil and gas and sub-sea applications. These include guided drogues and sub-sea buoyancy units.
